

**How To Trade Forex
With 100% Profitable
Trades Without Ever
Knowing How To Trade
Forex !**

The Story, The Solution, And The Secret...

Dear Friend,

What you're about to read and see is very powerful information, shared with a very small group of people to date, so I ask that you please treat it with confidentiality.

First of all, I'd like to thank you for taking the time to read this short report I prepared – I absolutely guarantee it will pay off.

My name is John Burroughs and for the past 4 years I've been living the dream of many - automatic income.

Actually,... let's rephrase that:

**Automatic Income With Extreme Accuracy
And Consistency – Without Caring If The
Economy Is Up, Down OR Sideways!**

I sure I don't have to tell you that there's a HUGE difference between **consistent** and “*who knows when it's coming*” income.

To put things more into perspective...

...a consistent income is a day job. You work hard and you get paid a

set amount at the end of the month. You know what the amount will be and you can plan your life based on that specific sum of money.

A “who knows when it’s coming income” is an income derived from any type of activity which, whilst it might be profitable (and we both know it’s not an easy job to find such profitable activities!), it is not consistent. One month you might make money, the next month you might break even... and the next month you might be profitable again. I don't know about you, but personally, I don't like the uncertainty of what might happen by the end of the month...

...but, at the same time, I don't like the idea of working a full time day job in order to guarantee me a certain and reliable level of income.

Now, don't get me wrong, there's nothing wrong in working a respectable day job - I did it for many, many years.

For as long as I can remember, my objective in life was always to have freedom. Yes, I do love to have money in my pocket like most others do... but that wasn't my main objective.

**It Is The Freedom To Do Whatever You Want,
Whenever You Want And However You Want That I
Believe Can Make A Person Truly Happy**

It's the little things that make up the big picture... Not having to set the alarm every single morning, being able to take vacations when you want rather than when you can, being able to spoil your loved ones with whatever you want and not with whatever you can afford. As I said before... freedom!

Let me tell you my Forex "story"...

From a very young age I was fascinated with the idea of trading the markets. I loved the idea of trading so much that I can vividly remember back to the early 80's when I placed my first trade.

Probably like you, I wanted to learn everything there was to know about trading but, unlike today, there was very little educational material available.

Trust me - it was tough to learn how to trade back then.

However, there was a flip side to that... although it was tough to learn how to trade properly, there was MUCH less competition in the markets than there is today. That meant it was **much easier** to find very profitable and unique patterns and strategies.

As time went by, more and more people started trading. There was more educational material, more insight to market behavior, and more understanding, etc.

That meant bad news...

Market patterns and trading methods that worked while there wasn't a

lot of competition didn't work as well as they did before - it's only natural. The markets back then were not as huge as they are today.

As more traders entered the market, the effect became more and more noticeable.

That just meant you had to try harder to succeed... and that was fine by me. I love challenges!

As time went by, 3 things became very clear and obvious to me:

1. Trading can be VERY profitable but must be done without any human emotions.
2. In order to be amongst the 1% most profitable traders you had to think outside the box. You had to be able to see and think differently to "the herd".

And 3... but MOST important...

The Time Of Manual Testing and Analyzing Is Over! The Future Is In Computer Based Analysis and Robot Driven Trading.

I started devoting a lot of time and effort into learning how to design computer models that could see what the human eye couldn't. I started taking advantage of the speed and accuracy a computer could

provide in contrast to a human being.

There was an advantage and a disadvantage to that...

The advantage was that I was amongst the very few who started using computer-driven analysis. *That meant that I was light years ahead of other traders.* While people were busting their butts trying to find profitable patterns and combinations I had my computers handing them to me on a silver platter!

The disadvantage was that, unlike today, back then computers were MUCH less powerful. That meant it took a very long time before I got any valid results... any workable strategies, patterns and combinations. Nevertheless, I started producing amazing automated systems that no one had access to... **systems that would outperform any trader.**

It's been **18 years** now since I began designing automatic trading systems and robots. Some of the biggest banks in the world have either purchased my Forex robots or have consulted with me regarding how to build them.

Why?

Well, the list is quite long and I won't bore you with it. However, one of the main reasons is the fact that my Forex robots are amongst the top performers in the world of trading. Just to give you a small example, one very well known bank paid me **\$115,000** to design a

Forex robot for them that automatically trades the EUR/USD pair.

Seems like a lot of money doesn't it? Well, it is... relatively speaking of course!

Why do I say relatively? Simply because they outperform the competition! And that's what counts when it comes to Forex trading. Either you trade with the best robot or don't trade at all.

The satisfaction I get from designing Forex robots is twofold:

I enjoy producing top-notch robots and selling them so that other people can make money. It's an incredible feeling when your efforts can make someone else's life better and infinitely different, but the real beauty of all this is that the Forex market is SO huge that there's no possibility of the robots being less efficient or accurate if many people trade with them. It's a true win-win situation.

And of course, I enjoy seeing my personal life improving when I trade my own robots... I already talked about the great freedom this provides me (or for that matter, anyone using my robots!)

Forex Trading...The Best Game In Town!

If you're reading this report then you probably know exactly what Forex is, but... just a few words for those who don't.

Forex trading, or Foreign Exchange trading, is the simultaneous buying and selling of one currency pair against another with the objective of catching price increases (long positions) or decreases (short positions).

A quick example... you bought GBPs (British Pounds) with USDs (US Dollars) at 1.8000. That meant you paid USD \$1.8000 for each GBP. If the price moves to 1.8010 (ten pips) and you traded one full lot then you made \$100 profit.

But don't worry. You DON'T need to know any of this at all and in a moment you'll understand why. I was just trying to give you a quick and general understanding of how a Forex trade works.

The Profit Potential Of The Forex Market Is Simply Amazing And Unparalleled

With around \$3 TRILLION traded every single day, the opportunities in Forex are endless. Just to clarify the scale of things... all of the world's markets (stocks, futures, bonds, etc) **combined** don't come

close to the size of the Forex market! That's how big it is.

But size is just the beginning of the story...

What makes the Forex market even more profitable and exciting is the size of the daily moves in currency pair prices. In other words, extreme volatility.

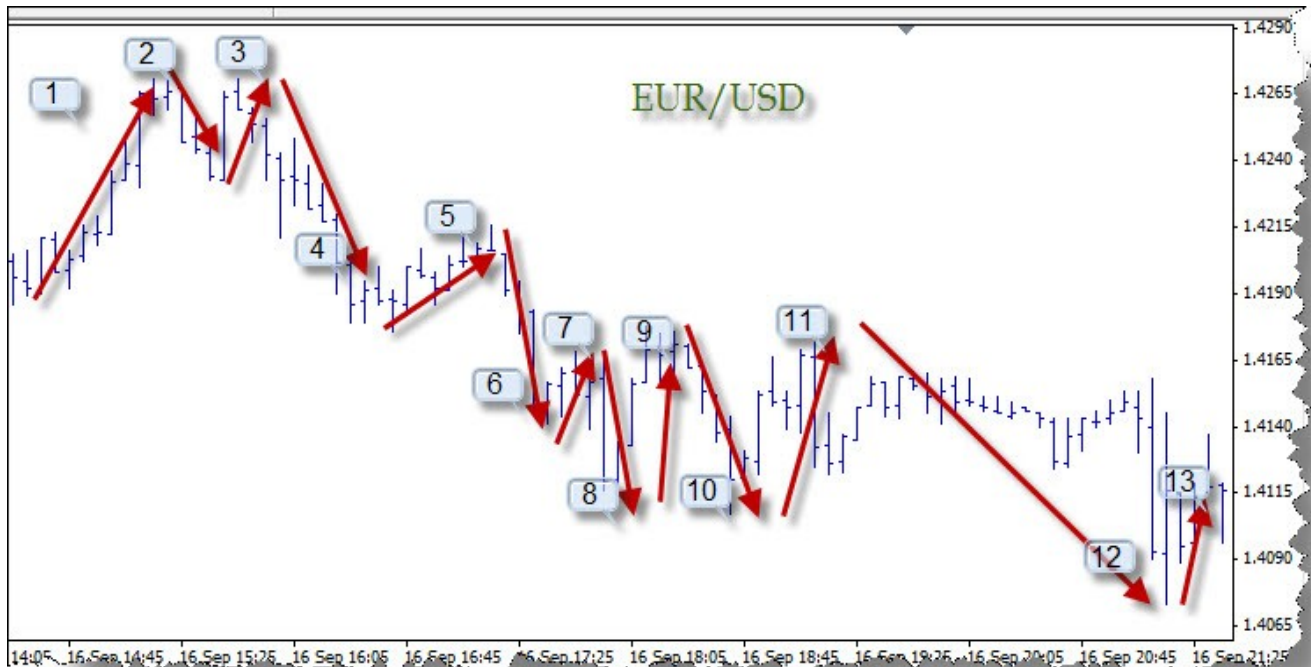

What does extreme volatility mean for you?

If the currency pair you're trading moves up and down many times throughout the trading session that, means you have many opportunities to catch juicy portions of those moves and bank them.

Of course, the right system, makes it so exciting that only few other things in life can compare to that feeling!

I want to illustrate the point so you have a much better understanding:

Look at the above chart....

That's a chart of EUR/USD. It shows only about 6 hours of market action. Look how many small swings happened in that time period... 13!!!

Each of those small swings offered a profit potential... a HUGE profit potential. We're talking about \$300, \$400, \$500 or more per swing.

Now... imagine being able to actually CATCH those little swings with LASER TARGETED accuracy... day in and day out... without ever having to lift a finger... 100% on autopilot... 100% hands free... without ever even looking at your computer screen!

Are you beginning to see what true power is all about?

Oh... one more thing - and this is one of the great advantages of the Forex

market that I mentioned already: These little price swings happen every single day, like clockwork... as long as the market is open, the little swings are there ...and a lot of them.

**The Key To Raking Thousands Of Dollars Per Day
Trading Forex Is Accurately Catching Small Price
Swings... Day In And Day Out...**

I learned that many years ago the hard way...

All my research, all my studying of the markets has always focused on finding trading systems that accurately catch these little price swings. And if you think about it carefully, it only makes sense. Let me explain...

When you're looking for big price swings, you're inevitably speculating on large market trends. The problem with large market trends is that you can be wrong 20 times before you actually catch one. Plus, you can never know if a trend has actually started or it's just a fake move and the market is about to continue moving sideways, eating up all your trading capital in the meantime.

Success in trading Forex comes from:

-  **Never focusing on big market swings**
-  **Aiming at small and repetitive profit objectives**
-  **Not caring what the market direction is**
-  **Trading a currency pair that moves many times per day up and down – high volatility**

I know what you're probably saying (or thinking) right now...

“Sure John, I've heard that argument many times before... one person says this approach is the right one, someone else says something completely different... who do I believe?”

Well... first of all, that's a very good question, but not very valid -
FORTUNATELY!

Most experts talk... but can they prove what they're talking about? Can they prove that what they're saying is true? Both you and I know the answer....

You see, in this game what counts is proof. Talk is cheap. If you haven't learned that by now you will... trust me!

My Personal Proof... My Backup To What I Say and Argue is...

The Most Advanced Forex Robot In Existence... The Perfect Automatic Trading Solution... A World Record Of Almost 9 Years With NO Losing Trades (Up To This Very Second!)

Using my findings, my out of the box approach, my objection to following what most people think and do has produced a true monster and has proven to the whole world that **100%** accuracy is possible.

A New Reality In Forex Trading... A New Future, A New Era

Times change... technology improves... and with that, our knowledge and understanding of how things work grows - dramatically.

People who resist believing that technology can do what a few years ago you would call a “miracle”, are damned to live in the past and never enjoy the fruits of the new era we live in.

Either join the future or live in the past... It's as plain and simple as that.

The **Forex AutoCash Robot**TM is the absolute best example of this important argument... of this important approach to life in general.

Nine, ten, eleven years ago, no-one ever dared *dream* about the possibility of creating trading software that would work like a Swiss watch... 100% accurate.

Welcome to the future, my dear friend!

The combination of years of market research/studying and technology has allowed me to produce my masterpiece... you could say, the cream of the crop.

You see, my Forex trading robots have always been accurate... they've always done their job better than the competition. That's why I was paid so much money by banks and investment firms/money managers to buy the complete rights to them.

However, the Forex AutoCash Robot™ is in a league of its own... a true, undefeated champion.

It's a final solution for the person who knows nothing about Forex but still wants to rip the incredible profit potential the Forex market provides, minute after minute.

It's a final solution for the person who wants a great income and a new way of life.

And, to be honest, it's a true no-brainer to understand why:

- **100% Profitable** – No losing trades to date (almost 9 years!)
- **Plug & Play** – Download it, plug it in and walk away... no need to come back except to look at the profits building up
- **No Learning Curve** – Know absolutely nothing about Forex and still rake in thousands of dollars per day
- **New Discovery** – You'll have a piece of a new era, a new future... a new technological advance that few traders will ever have access to
- **Undefeated** – No other Forex robot in existence has been able to outperform the Forex AutoCash Robot™...not even close.

As I said before, this is a true no-brainer. It's the ultimate income monster, the heavyweight champion of the world.

I want to focus on something very important... a question that begs to be asked... one that is sitting in the minds of every single reader of this report...

**How Can A Forex Robot Have Zero Losing Trades...
And For So Long!
Is It Really Possible?**

Before I dig into that, I ask one thing from you: Forget everything you have seen, learned or heard about Forex trading... it's irrelevant! What you're about to experience in the very near future is a new discovery and that's how you should treat it.

Ok, let's first focus on the "how" part....

I talked about this earlier and it's very important that you understand the concept well. It's MUCH easier to predict where price will be in the next 5, 10 or 20 minutes than to predict where it it'll be in the next 2, 3 or 4 days.

In other words... accurately catching small price swings can be done much more precisely than catching large price swings.

Not only are they much more predictable, they occur far more frequently and, importantly, much more consistently and reliably.

Every single day for the past 10 years the EUR/USD has had enough small price swings throughout the day to make it a true cash machine. Now, (and here is the really important part)... with the help of advanced computers and a revolutionary approach to market analysis (developed by me, which I call *Reverse Price Trade Intervals* - "RPTI"). I won't even get into RPTI because it's not relevant for the purposes of this report.

The only important thing to understand is that RPTI is the product of almost 18 years of research and the underlying factor responsible for almost 9 years with no losing trades!

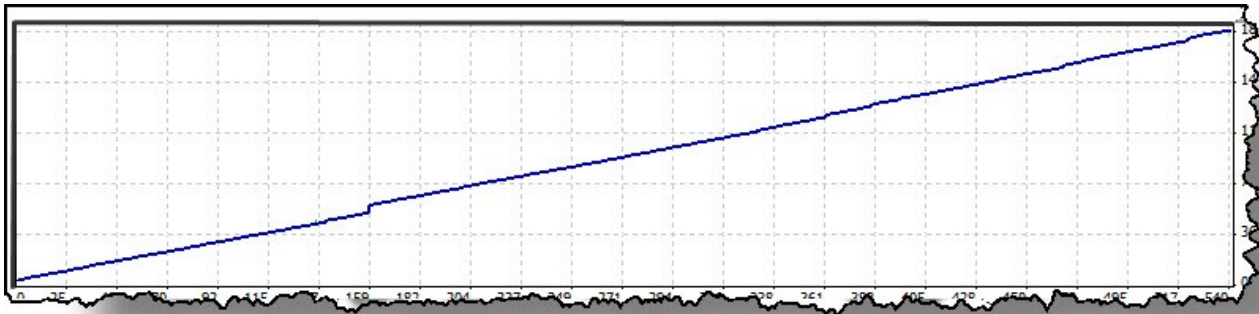

It's the reason why you'll have the chance to build a life that most people never even dream of.

Sorry for being so bold regarding that last statement, but there's no need to beat around the bush – it's the plain truth.

And now to the "Is it really possible?" part...

Words are cheap... I live by that rule! I'm the type of person that if you claim something, I'll say "PROVE IT!"

...and I'm sure you're the same, so let's get to the point. Let's take a quick look at the following:

Let me explain what the above is....

The blue line represents every trade taken by the Forex AutoCash Robot™ since January 1st 2000 (almost 9 years).

It Never Moves Down!

In other words... *Never moves down = no losing trades!*

100% Profitable, 100% Accurate!

It's not a matter of opinion whether my discovery works, it's a fact. A fact that's been repeatedly proven for almost 9 years.

That's the real beauty of trading... it's an exact science. Being an exact science means that the numbers don't lie. Hence, either you back your words with exact numbers or your words are meaningless.

“A New Lifestyle, A New Profitable And Secure Future For You”

We're smart people and we know that if we can put technology to work for us then we can make our lives better. Think about it...

- *Before cars appeared we rode the horse, bicycle or walked...*
- *Before the cell phone appeared we couldn't keep in constant touch...*
- *Before the TV appeared we couldn't easily watch movies from the comfort of our home...*
- *Before airplanes were built we had to spend days travelling from one place to another...*

All these discoveries and advances made our lives better... technology has improved our quality of living and it will continue to do so.

It's no different with Forex trading...

Ten years ago it wasn't even something the average person would dare to think about... a Forex robot that trades automatically for you? ...that was reserved for the big guns (banks, money management firms, etc).

But that changed no more than 3-4 years ago. The Internet, speed of connection, computer power, online Forex brokers, small spreads... it all made it possible for the small guy to start trading the Forex market automatically with robots.

And today, I'm taking this one step further, I'm establishing a new technological advance, a new invention and discovery... robot driven Forex trading with unheard of accuracy to the tune of 100%!

Start Small, Grow Huge... Finally Possible!

I already mentioned this - not too long ago, Forex trading was reserved for people with fat bank accounts. You couldn't start trading with less than \$50,000!

Not anymore...

Times change. Intense competition amongst Forex brokers and the Internet has come to the rescue of the small guy who wants to trade but couldn't afford to do so before.

Today you can open a live account with some Forex brokers with as little as \$50 and sometimes much less!

But it doesn't end there. Here's the better part of all of this...

You don't have to risk a single cent in order to start trading and prove to yourself that your Forex robot is a money maker...

Why? Well, simply because every Forex broker will allow you to open a free demo account where your robot can trading in real market conditions but without risking real money.

Like the results after demo trading? Go live with as little as \$50 or less!

In other words... and to put it in simple terms: You don't have to risk a single cent to know if your robot is a true money maker.

Show me another income/business opportunity in the world where:

- *You don't have to risk a single cent to see if it works, and*
- *You can start with as little as \$50 or less once you've seen proof that it works*

Now tie all that to the fact that you can have a robot trading for you that hasn't had a losing trade in almost 9 years!

Now you understand why I love Forex trading so much... and trust me, so will you from now on.

The freedom, the lifestyle, and the excitement are unparalleled!

A Final Word...

There are always exciting opportunities in life, but only the smart ones know how to spot them and take advantage of them.

I learned that the hard way...

I don't know if it's ever happened to you - you thought you saw something great but were afraid and hesitated, only to later say "*why didn't I act on it!*" after seeing someone else run with it and enjoy massive success.

Well, if you have, you're not alone! I'm with you there. But, hopefully we all live and learn, right?

Life teaches us things and it's the wise ones who take those lessons and apply them to the future. Today I don't hesitate - if I like something... if I feel good about something, I go for it. I learned that the satisfaction you get from knowing you did something, that you acted instead of hesitating, is worth its weight in gold!

Technological advances in the Forex world have brought opportunities that are simply incredible and, by now, I hope you understand that I'm not exaggerating.

This is the real deal....

It's a true wealth building solution for the small guy. A way to breakout into a new profitable future filled with freedom and satisfaction.

I want to thank you for reading this important report. I hope I opened your eyes to a new reality. But most of all, regardless of whether you become part of the Forex AutoCash Robot family, I hope I've showed you that it truly is worth taking a step forward instead of standing still. No one has ever accomplished anything in life from standing still.

Yours truly,

A handwritten signature in blue ink that reads "John Burroughs".

John Burroughs
